WIS Admin: quick guide

How to update the Warrnambool Islamic Society website.

Log in

1. Go to the website address and add **/admin** at the end.
2. Type your email and password, then press **Sign in**.
3. When you finish, press **Log out** (bottom of the menu on the left).

What each part does

Overview	The next prayer, today's times, and a short list of things that need you.
News posts	Write, edit or delete news. Choose *Show on the website* to publish. *Show this post first* pins it to the top.
Events	Add upcoming events. Finished events disappear from the website by themselves.
Members	Membership requests from the website appear here as **New**. Press **Approve** once you have checked them.
Team	The office bearers on the About page. Use the arrows to change the order.
Prayer times	Azan times are worked out automatically. You choose the Iqamah (minutes after Azan, or a fixed time). Turn on *Show prayer times on the website* when the times look right in the preview.
Jumu'ah	One time for each season. The website changes the time on the first day of a new season. A red box warns you if a day has no time.
Donations	The message and bank details on the Donate page, and what people can give to.
Website info	Phone numbers, email, Facebook link, and an optional message across the top of every page.
Admin users	Who is allowed to make changes.

Common jobs

- **Post news:** News posts, then New post. Add a title, a short summary, the text and a photo. Keep *Show on the website* ticked, then Save.
- **Hide something:** open it, untick *Show on the website*, then Save. Nothing is lost.
- **Change Jumu'ah:** Jumu'ah, then Edit the season and change the time. To add a summer time, add a second season and make sure the dates join up.
- **Ramadan:** Prayer times, then Ramadan, then Add dates. Enter the first and last day, the Isha Iqamah and the Taraweeh time.

Good to know. Changes show on the website within a moment of pressing Save. A green message at the bottom confirms it. If something does not look right, open it again and fix it, or ask the website team.
